Welcome to Bus/Econ Math!

Lecturer:	John Baber
Website:	http://www.math.uconn.edu/~baber
E-mail:	baber@math.uconn.edu
Office:	MSB M-335
Office Hours:	Tuesday 12noon-4pm
Course:	Math 1070Q Section 030
Meets:	Monday, Wednesday, Friday 3pm-3:50pm in TLS 154
Text:	Applied Finite Mathematics by Tomastik & Epstein

Discussion sections

Time	M	T	W	R	F
8		Sandi Xhumari MSB M-403 (§031D)			
9		Asiri Gunathilaka CHMT M-213 (§038D)			
10-1					
2				Sandi Xhumari CHMT 309 (§035D)	
3:30		Sandi Xhumari MSB M-407 (§033D)		Sandi Xhumari MSB M-311 (§034D)	
4					
5		Sandi Xhumari MSB M-415 (§036D)		Sandi Xhumari MSB M-415 (§030D)	
6		Asiri Gunathilaka MSB M-211 (§039D)		Asiri Gunathilaka MSB M-211 (§041D)	

Website and E-mail. Everything I ever hand out or say will be at my website – including this sheet. You can e-mail me anything except actual math questions since these are too hard to do by correspondence.

Homework (WebAssign). You will have regular, graded homework. Assignments are viewed and answers submitted online using WebAssign. (https://www.webassign.net/login.html) You first homework assignment should be available on Tuesday, August 31 and will be due *Saturday, September 11.* It is your responsibility to keep track of WebAssign due dates. You will have at least 8 days to do each assignment. There will be 2 or 3 assignments per week. WebAssign expects the exact answer. For example, if the answer is $\frac{1}{3}$, type in "1/3" and not "0.3333". You will have 5 attempts for each problem.

Your username is the part of your Huskymail account before the "@". For example, if your Huskmail address is "Henri.Poincare@uconn.edu", then your username will be "Henri.Poincare". (Please e-mail me if this is not the case.) Your initial password is "letmein". You should change it immediately upon first logging in. You will need to purchase a WebAssign access code from the UConn Coop.

Quizzes. There will be regular quizzes during the discussion sections. Makeup quizzes will, in general, not be given. If a quiz is missed for a university accepted reason, then the quiz portion of the grade will be computed ignoring that quiz. You must contact me to have a quiz excused.

Midterms. Two midterm exams will be given on **Monday, October 4** and **Monday, November 8**, both at **6-8pm**. Mark your calendars now. If you have a conflict with either of these times, you must e-mail me during the first two weeks of class.

Calculators. Calculators will not be allowed on quizzes. Only non-graphing calculators will be allowed on exams. (e.g. TI-30X-IIS is allowed, but TI-83 and TI-84 are disallowed). Calculators are good for exploring problems and doing dirty arithmetic, but it's good to try to do as much of a problem as you

can without any mechanical aides. If you bring a calculator to an exam, make sure it cannot do any symbolic manipulation. During exams, your calculator may be randomly selected to have its memory and abilities inspected. Don't store any (math) formulas in it. If formulas are found you could get a letter from the Dean, a 0 on the exam, an F in the course, or worse.

Grading.

Final Exam: 30%
Midterm One: 25%
Midterm Two: 25%
Quizzes: 10%
WebAssign: 10%

Reading. All material lectured on and assigned as reading is examinable. Some material will only be given in lecture. Some material will only be given as reading. You are expected to read the material *before* class. We will follow the textbook in the following order: 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 5.1, 5.2, 5.3, 5.4, F.1, F.2, F.3, F.4, 1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3

Extra Help and Office Hours. When you need help with homework or just understanding a concept, you have a lot of help available to you:

- ***See me in MSB M-335 Tuesday 12noon-4pm***
- ***Visit your teaching assistant***
  - — Sandi Xhumari in MSB M-119 Tuesday 10am-12noon or Wednesday 12-1pm
  - — Asiri Gunathilaka in MSB M-229 Tuesday 12noon-2pm
- ***Visit the Q-Center in the Learning Commons on Level 1 of the Homer Babbidge Library.*** You can get drop-in tutoring there, form and assist in study groups, and look at their bank of previous exams. To find out more, visit http://qcenter.uconn.edu
- ***Visit the teaching assistants of other lecturers***
  - — Yafeng Wang in MSB M-419A Tuesday 12:30-1:50pm and 2:30-4:30pm or Wednesday 3-4pm
  - — Haoyu Gu in MSB M-119 Wednesday 9:30-10:30am or 2-3pm and Friday 9-10am.
  - — Tian Qin in MSB M-201 Monday 1-2pm, Wednesday 9-10am, or Wednesday 11-12pm
  - — Sarah Hoy in MSB M-419A Tuesday 9-11am and Thursday 3-4pm
  - — Lu Lu in MSB M-201 Monday 3-5pm or Thursday 9:30-10:30am.
- ***Visit one of the other lecturers for this coordinated course***
  - — Steven Pon in MSB M-326 Wednesday 3:30-4:30pm, Thursday 11-12pm, or Thursday 1-2pm
  - — Paul Ellis in MSB M-326 Tuesday at 10:50-11:20am and Tuesday 2:15-4pm, Wednesday 12:30-1pm, or Thursday at 10:50-11:20pm

You do not need to make an appointment to see someone during their official office hours.

Special accomodations for athletes and students with disabilities. Inform me as soon as possible of your commitments as an athlete and/or any special needs that you have. You will be expected to bring a letter from the Athletics Department or the Center for Students with Disabilities. The sooner you notify me, the better I'll be able to accomodate you.

Religious observances. The University Senate motion on religious observance stipulates: "Students anticipating such a conflict should inform their instructor in writing within the first three weeks of the semester, and prior to the anticipated absence, and should take the initiative to work out with the instructor a schedule for making up missed work." For conflicts with final examinations, students should contact the Office of Student Services and Advocacy.

Applied Finite Mathematics

Contents

Preface v

1 Systems of Linear Equations and Models 2
- 1.1 Mathematical Models . . . 3
- 1.2 Systems of Linear Equations . . . 20
- 1.3 Gauss Elimination for Systems of Linear Equations . . . 31
- 1.4 Systems of Linear Equations With Non-Unique Solutions . . . 50
- 1.5 Method of Least Squares . . . 68
- Review . . . 80

2 Matrices 86
- 2.1 Introduction to Matrices . . . 87
- 2.2 Matrix Multiplication . . . 97
- 2.3 Inverse of a Square Matrix . . . 114
- 2.4 Additional Matrix Applications . . . 126
- Review . . . 139

3 Linear Programming: The Graphical Method 142
- 3.1 Linear Programming Problems . . . 143
- 3.2 Graphing Linear Inequalities . . . 156
- 3.3 Graphical Solution of Linear Programming Problems . . . 168
- Review . . . 181

4 Sets and Probability 184
- 4.1 Introduction to Sets . . . 185
- 4.2 The Number of Elements in a Set . . . 194
- 4.3 Sample Spaces and Events . . . 201
- 4.4 Basics of Probability . . . 209
- 4.5 Rules for Probability . . . 216
- 4.6 Conditional Probability . . . 225
- 4.7 Bayes' Theorem . . . 238
- Review . . . 246

5 Counting and Probability 254
- 5.1 The Multiplication Principle and Permutations . . . 255
- 5.2 Combinations . . . 265
- 5.3 Probability Applications of Counting Principles . . . 272
- 5.4 Bernoulli Trials . . . 278
- 5.5 Binomial Theorem . . . 284
- Review . . . 288

6 Probability Distributions and Statistics **290**
6.1 Random Variables and Histograms 291
6.2 Measures of Central Tendency 303
6.3 Measures of Spread 316
6.4 The Normal Distribution 329
6.5 Normal Approximation to the Binomial Distribution 339
Review 347

F Finance **352**
F.1 Simple Interest and Discount 353
F.2 Compound Interest 359
F.3 Annuities and Sinking Funds 368
F.4 Present Value of Annuities and Amortization 376
Review 386

Area Under a Normal Curve **390**

Answers to Selected Exercises **392**

Bibliography **407**

Index **410**
