Text: *Calculus, Early Transcendentals, Volume 2* by James Stewart (6th Edition), with *WebAssign* code. Graphing calculators will be used (TI 82, 83, 85 or 86 recommended)

You can buy Volume 2 of the Stewart text at the UConn Coop, online directly from the publilsher (with a discount), and many other places. CAUTION: Make sure you get WebAssign codes bundled with the text as they cost about $25 each semester when purchased separately. Volume 1 of Stewart is used only for Math 1131. You will need to purchase Volume 2 for Math 1132 and the multivariable volume for Math 210. We chose the single volumes as the recommended text since were able to have WebAssign codes (for one semester) bundled with each single semester text. However, you are able to purchase combined versions (a complete singe-variable version for Math 1131-1132 or one large, heavy book for 1131-1132-210) but make sure you get two or three semesters of WebAssign codes bundled with them. When bundled with the text, the first Webassign code is free and additional semesters of WebAssign codes when bundled with the text cost $10 each after the first.

The publisher has set up a special web page, http://ichapterssites.com/ichapters/micro/?cluster_id=1756, for UConn students to purchase a text online with the WebAssign codes bundled at a discount.
